

NexTraq Fleet Tracking Platform

Proven Results. Rapid ROI.

The NexTraq fleet tracking platform is the highest value vehicle and fleet management solution in the industry. 100% cloud-based, the solution enables organizations to proactively manage and track its fleets in real-time while reducing operational expenses and maximizing revenue. A proven fleet management solution designed for ease of use and rapid deployment and ROI can help your organization:

Increase:

- Productivity
- Profitability
- Accurate Billing
- Job Validation
- Customer Service

Reduce:

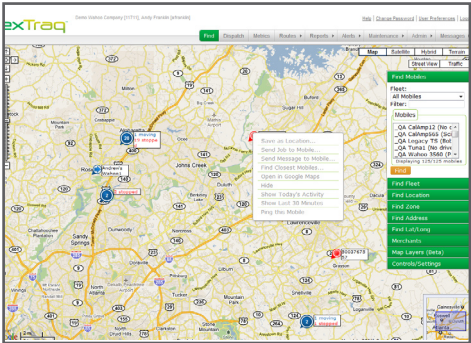

- Fuel Costs
- Insurance Costs
- Labor Expenses
- Idle Time
- Maintenance Costs

Because the NexTraq Fleet Tracking system is a cloud-based solution, there is no software to buy or install and no additional burden on infrastructure. Customers simply login to the secure website to access real-time GPS fleet tracking information on their fleet from any Web-enabled device. NexTraq customers rely on fleet tracking for 24/7 access to the information they need to drive forward.

“NexTraq is a progressive company on the forefront of technology. I consider them a GPS expert. By aligning myself with experts, our entire company works smarter and more efficiently.”

Frank Steinocher
CIO for Shumate Mechanical

94% of NexTraq customers would refer our solution to another business or associate.

In a recent customer satisfaction survey sent out to more than 5,000 NexTraq customers, we asked, “How has your MARCUS Fleet Tracking solution impacted your business?”
